<ul style="list-style-type: none">Project oriented course for learning web development, including HTML, CSS, JavaScript.		

Personal Projects

- **Portfolio Website**
 - Developed and launched a multifaceted portfolio website demonstrating coding expertise, design sensibility, and showcasing a variety of diverse technical projects.
 - Incorporated FormSubmit for direct email invoicing via the website's contact form.
 - Utilized Vercel's hosting and DNS services to deploy my portfolio website for public access.
 - **Poseidon's Personal Dashboard**
 - Designed, built, and deployed an efficient, productivity-focused personal dashboard.
 - Managed user sign-in, authentication, and route protection with NextAuth.js & Google OAuth.
 - Enabled data, file, and image storage on the dashboard using Firebase's serverless backend.
 - Developed a tracker for online gaming matches with team-specific search functionality.
 - **Blog Website**
 - Utilized React, Firebase, and Typescript to create an engaging and functional blog website.
 - Deployed Firebase Auth to provide secure user access and seamless sign-ins.
-
